Three military doctors say medical billing code data captured by Defense Medical Epidemiology Database shows sharp spikes in miscarriages, myocarditis, cancer diagnoses, Bell's palsy, female infertility. According to the data found by the military doctors, there was also a nearly 300% increase in cancer diagnoses, from a 38,700-per-year average in 2016-2020 to 114,645 in 2021.
