November 12, 2009

Ukraine's Prime Minister Yulia Tymoshenko wears a protective mask as she visits a hospital in Ivano-Frankivsk November 3, 2009.

On October 30th, "2009 editors of local papers in Kyiv, Ukraine received a flood of phone calls from citizens reporting low flying aircraft [spraying an unknown aerosolized substance](#) over L'viv, Ternopil and other cities. On October 27th "the Ukrainian media broke the story that on October 26th "in Ternopil an [unknown flu had killed seven people](#) , and that over the past few days about 6 thousand people had sought out medical attention in regards to flu like symptoms. From this first report through to the 9th "of November over [1 million people](#) inside the Ukraine people have contracted some form of flu like illness. This is almost double the number of 'confirmed' H1N1 cases

worldwide in all other countries. There have also been over [155 deaths](#) reported due to influenza during this time. This outbreak is unprecedented yet it has received [minimal coverage in the western media](#). It just seemed to get lost amidst all of the swine flu coverage, and written off as just more cases of H1N1 before any lab samples had been processed. In the Ukrainian and "Russian media however the outbreak has been treated more seriously and has been referred to as 'pneumonic plague'. On October 29th "a report came out of Ukraine describing the deaths of [6 young people in the Ivano-Frankivsk Oblast](#). After the autopsies were performed it was recorded that the cause of death in these individuals was "[severe hemorrhagic pneumonia](#)". Also unconfirmed reports from bloggers in the Western Ukraine that doctors were seeing that this was a new form a flu that [killed much faster than the regular H1N1 virus](#). "Soon Ukrainians started to panic, and the stores emptied of masks and all forms of flu medication. Even onions, garlic, and lemons became scarce in so me cities. As a countermeasure to this outbreak [9 Oblasts \(cities\) were placed under quarantine](#) by the government. The WHO sent a team of experts to take samples of this new flu and send them back to the Mill Hill lab in London to determine the gene sequences of this flu, and to discover if this was in fact the same Californian/Mexican A/H1N1 virus. "On November 3rd "the WHO announced that [the samples had been received at Mill Hill](#), yet almost a week later there have been no reports issued and no gene sequence data released. If these were typical samples it seems that an announcement would have been made already. "The silence is deafening. It should also be noted that rumors of the doctors being told not to disseminate any information about the new flu cases that would incite any panic, were later confirmed by statements made by the Ukrainian government that [police have been told to confiscate hospital reports](#) on patients who have recently contracted the flu." All things considered, it would not be a surprise if this unidentified virus turned out to be far more serious than the mild A/H1N1 circulating the globe.

[efoods]Two unconfirmed reports, one in [2002](#) and one in [2009](#) by alleged government insiders revealed that at some point that live 1918 Spanish flu would be released on a large scale in the

form of a vaccine, for the purpose of mass genocide. The August 2009 report by [Joseph Moshe](#) revealed that he was involved with Baxter in a plan to release the 1918 virus in the Ukraine. Not only was it confirmed that he was a microbiologist, his claim was also substantiated by the current Ukrainian outbreak. After a number of deaths in September the Ukrainian government "[banned the use of the H1N1 vaccine](#)". This would make it quite difficult to release the 1918 virus as described by Joseph Moshe." It now seems as though the vaccine ban will be lifted and h1n1 vaccines will be forced on the people of Ukraine. "On November 9th"the"[Globe and Mail](#)"published a story that revealed, despite"[previous claims](#)"by the Ukrainian Government that they had not authorized the use of aerosolized medication on the public as a response to the outbreak, that they in fact "sprayed the city with the necessary products"." Was this in fact medication or disinfectant? If so why would the government deny this? "Was the spraying in fact a release of the mystery flu? Was the original intention to release it via the vaccine? Was the aerosol release the plan B after the Ukrainian government banned the use of the vaccine? A [blog post from a Lviv resident](#) claimed that his mother who works for the city council received a text message the night of Oct 29th from a colleague warning her to keep her windows closed as something was to be sprayed. The context wasn't crystal clear. It could have been a warning regarding a street disinfecting procedure as is often done during typhoid outbreaks. The government's denial is not irrefutable proof of a bio-attack, but it is suspicious.

As reported by [SkyWatch Canada on September 15th](#) , the frequency of low flying aircraft with unusual flight patterns have caught the attention of Canadians living in the Nation's Capital. Is there a chance that Canadians are being acclimated to these types of flight patterns for a future bio-release ? In 1994 such an [event took place in the town of Oakville, Washington](#) where there were confirmed reports of a clear gel like substance raining from the sky and making residents horribly ill. Readers should also be reminded of the [report given on the Power Hour radio show](#) in March 2009, about truckloads of "bird flu" being delivered throughout America to underground missile silos orchestrated by the department of homeland security. Several of those loads were delivered into the back of a military C-130 (an aircraft often equipped with an aerosol dispersal system). Was this multi-million dollar operation conducted for the purpose of spreading the mild and basically insignificant H1N1 demi-flu ? Or has the final phase of the operation yet to occur? Has the event to justify the recent American National Emergency yet to occur? Will the CDC finally make use of their scores of mass graves and plastic caskets? Will the military be deployed to put the country under pandemic lockdown, as we have [seen in the Ukraine](#)? Far too much has been put into the H1N1 fiasco for it to amount to a mere outbreak of the common cold. It seems like many pieces of a plan have been put in place. Will the NWO put the people in check? Will the virus 'Mutate'? Is this the beginning of the Globalist Endgame of population reduction ?

There are reports now coming from [Romania, India, Bulgaria, Belarus, Turkey](#), Norway that the rate on increase of flu is increasing rapidly. In Norway for example [300,000 residents contacted the flu in a single week](#). Whatever disease has been released is moving across Europe fast. This bug has spread too widely to be a Ukrainian election scam. Readers should note that just before the outbreak in Ukraine, the government was running pneumonic plague drills. In early November, there were also [pneumonic plague drills being run in Illinois](#). Connect the dots. Notable there have also been reports of [heavy supply and personnel movement in and out of known D.U.M.B.s](#) (Deep Underground Military Bases) very recently. According to an unconfirmed report the [parking lots of these bases are full](#) and haven't been this full since just after 911. What is going on? Will this fast moving disease be released in America? Listen for low flying aircraft. Shut your windows at night. Stock up on colloidal silver, antibiotics and high quality vitamins. Please watch the skies!
